Municipal District of Taber & County of Newell

Intermunicipal Development Plan

1 | INTRODUCTION

1.1 Purpose of the Plan

The purpose of the Municipal District of Taber (MD of Taber) and County of Newell Intermunicipal Development Plan (IDP or the Plan) is to foster ongoing collaboration and cooperation regarding planning matters and issues of mutual interest and address and clarify land use expectations within the agreed upon intermunicipal development plan area (Plan Area).

This IDP serves as a planning tool providing guidance to decision-makers through the agreed upon planning policies that apply to the land within the Plan Area. The IDP contains policy that is to be used as a framework for working cooperatively, communicating and making decisions in each municipality. Each municipality is ultimately responsible for making decisions within their own municipal jurisdiction.

1.2 Plan Goals

The intended goals of the IDP are:

- To promote consultation, coordination and cooperation regarding planning matters of joint interest within the Plan Area.
- To provide a framework for addressing land use concerns with regard to joint planning matters within the Plan Area.
- To provide a clear policy framework that serves to guide future planning decisions for land located within the Plan Area, affording enhanced coordination of development within the Plan Area.

The preparation and implementation of an IDP can result in many benefits to both municipalities including, but not limited to, the following:

- To establish an approach to identify possible joint ventures for infrastructure and service sharing to promote efficient planning and potential delivery of services.
- To reinforce and protect each municipality's development philosophies and goals while minimizing the potential for future intermunicipal conflict.
- To provide policy addressing plan administration, amendment and dispute resolution procedures.

1.3 Legislative Requirements

This Plan has been prepared in accordance with the requirements of the *Municipal Government Act, Revised Statutes of Alberta 2000, Chapter M-26, as amended (MGA)*, and complies with the *South Saskatchewan Regional Plan*.

Specifically the MGA requires:

631(1) *Two or more councils of municipalities that have common boundaries that are not members of a growth region as defined in Section 708.01 must, by each passing a bylaw in accordance with this Part or in accordance with Sections 12 and 692, adopt an intermunicipal development plan to include those areas of land lying within the boundaries of the municipalities as they consider necessary.*

631(2) *An intermunicipal development plan*

a) must address

- i. the future land use within the area,*
- ii. the manner of and the proposals for future development in the area,*
- iii. the provision of transportation systems for the area, either generally or specifically,*
- iv. the co-ordination of intermunicipal programs relating to the physical, social and economic development of the area,*
- vi. environmental matters within the area, either generally or specifically, and*
- vii. any other matter related to the physical, social or economic development of the area that the councils consider necessary.*

and

b) must include

- i. a procedure to be used to resolve or attempt to resolve any conflict between the municipalities that have adopted the plan,*
- ii. a procedure to be used, by one or more municipalities, to amend or repeal the plan, and*
- iii. provisions relating to the administration of the plan.*

The South Saskatchewan Regional Plan (SSRP) came into effect September 1, 2014. The SSRP uses a cumulative effects management approach to set policy direction for municipalities to achieve environmental, economic and social outcomes within the South Saskatchewan Region through 2024.

Pursuant to Section 13 of the *Alberta Land Stewardship Act*, regional plans are legislative instruments. The SSRP has four key parts including the Introduction, Strategic Plan, Implementation Plan and Regulatory Details Plan. Pursuant to Section 15(1) of *ALSA*, the Regulatory Details of the SSRP are enforceable as law and bind the Crown, decision-makers, local governments and all other persons while the remaining portions are statements of policy to inform and are not intended to have binding legal effect.

The Regional Plan is guided by the vision, outcomes and intended directions set by the Strategic Plan portion of the SSRP while the Implementation Plan establishes the objectives and the strategies that will be implemented to achieve the regional vision. As part of the Implementation Plan, Section 8: Community Development includes guidance regarding Planning Cooperation and Integration between municipalities with the intention to foster cooperation and coordination between neighbouring municipalities and between municipalities and provincial departments, boards and agencies. Section 8 contains the following broad objectives and strategies.

Objectives

- *Cooperation and coordination are fostered among all land use planners and decision-makers involved in preparing and implementing land plans and strategies.*
- *Knowledge sharing among communities is encouraged to promote the use of planning tools and the principles of efficient use of land to address community development in the region.*

Strategies

- 8.1** *Work together to achieve the shared environmental, economic, and social outcomes in the South Saskatchewan Regional Plan and minimize negative environmental cumulative effects.*
- 8.2** *Address common planning issues, especially where valued natural features and historic resources are of interest to more than one stakeholder and where the possible effect of development transcends jurisdictional boundaries.*
- 8.3** *Coordinate and work with each other in their respective planning activities (such as in the development of plan and policies) and development approval process to address issues of mutual interest.*
- 8.4** *Work together to anticipate, plan and set aside adequate land with the physical infrastructure and services required to accommodate future population growth and accompanying community development needs.*
- 8.5** *Build awareness regarding the application of land-use planning tools that reduce the impact of residential, commercial and industrial developments on the land, including approaches and best practices for promoting the efficient use of private and public lands.*
- 8.6** *Pursue joint use agreements, regional services commissions and any other joint cooperative arrangements that contribute specifically to intermunicipal land use planning.*
- 8.7** *Consider the value of intermunicipal development planning to address land use on fringe areas, airport vicinity protection plan or other areas of mutual interest.*
- 8.8** *Coordinate land use planning activities with First Nations, irrigation districts, school boards, health authorities and other agencies on areas of mutual interest.*

The above strategies were considered by both municipalities when developing policy within this IDP and will be considered when rendering land use decisions pertaining to development within the Plan Area.

1.4 Plan Preparation Process

A background and study area analysis was undertaken which served as the foundation from which both municipalities could review the existing land use conditions and determine the relevant issues, goals and objectives. Once each municipality's perspectives were identified, a draft document was prepared for review by each council prior to consultation with affected landowners, stakeholders and the general public at an Open House.

After the Open House, a refined document was then prepared and final draft was forwarded to each Council for review. As required by the *MGA*, public hearings were held by each Council and subsequent to the public hearings, the IDP was adopted by each municipality under separate municipal bylaws.

2 | PLAN AREA

Given the vast size of the municipalities, in order to focus on the border area and potential impacts, an area approximately 2 miles on each side of the shared border was examined. The purpose was to identify opportunities and constraints, which may affect land use planning in the Plan Area. After consideration of social, economic and physical features listed below, it was determined that a Plan Area of approximately 1 mile (1.6 km) on each side of the municipal boundary was adequate (refer to Map 1 for illustration of the Plan Area).

Within the Plan Area the following features were examined:

- Residences and Urban Areas
- Land Use and Zoning
- Surface Water
- Confined Feeding Operations (CFOs)
- Active / Potential Sites for Surface Materials Extraction
- Transportation Corridors
- Canada Land Inventory (CLI) Soil Index Values
- Environmentally Significant Areas (ESAs)
- Historical Resource Value (HRV) Sites

2.1 Key Characteristics of the Plan Area

The MD of Taber and County of Newell Intermunicipal Plan Area encompasses approximately 17,825 hectares (44,045 acres). Key characteristics of the Plan Area include the following, some of which are illustrated on Maps 2-5 in Appendix A:

- **Agriculture**
 - All lands are zoned for agricultural use.
 - A mix of agricultural operations exist, including grazing, irrigated and dry land farming.
 - Confined feeding operations are also located within the Plan Area.
- **Limited Residential Development**
 - A significant portion of land in the MD of Taber is Crown land and contains few residences. The County of Newell contains significant amounts of land under the ownership of the Eastern Irrigation District and contains few residences.
 - No hamlets or other urban municipalities exist within the Plan Area.

- **Transportation Infrastructure**

- The only transportation links between the municipalities are provincial highways 36 and 875 crossing over the Bow River.

- **Natural Resource Development**

- Oil and gas activity is abundant in both municipalities.
- There is a high potential for sand and gravel development within the Bow River valley.

- **Bow River Valley**

- The Bow River defines the border between the two municipalities.
- Environmentally significant areas of Regional Significance are concentrated along the Bow River corridor.
- The potential for land that may contain historic resources that may require avoidance is located along the Bow River corridor.

- **Soil Characteristics**

- The Canada Land Inventory (CLI) indicates moderate to severe crop limitations for most of the region.
- Soil classes 1 through 7 are present, resulting in a diversity of agricultural practices.

Dispute Resolution

In the case of a dispute, the following process will be followed to arrive at a solution:

- 5.1.4 When a potential intermunicipal issue comes to the attention of either municipality relating to a technical or procedural matter, such as inadequate notification or prescribed timelines, misinterpretation of Plan policies, or a clerical error regarding the policies of this Plan, either municipality's Land Use Bylaw, or any other plan affecting lands in the Plan area, it will be directed to the administrators of each municipality. The administrators will review the technical or procedural matter and if both administrators are in agreement, take action to rectify the matter.
- 5.1.5 Should either municipality identify an issue related to this Plan that may result in a dispute that cannot be administratively resolved under Section 5.1.4 or any other issue that may

result in a dispute, the municipality should contact the other and request that an Intermunicipal Development Plan Committee meeting be scheduled to discuss the issue. The Committee will review the issue and attempt to resolve the matter by consensus.

- 5.1.6 Should the Intermunicipal Development Plan Committee be unable to arrive at a consensus, the administration of each municipality will schedule a joint meeting of the two Councils to discuss possible solutions and attempt to reach consensus on the issue.
- 5.1.7 Should the Councils be unable to resolve the matter, either municipality, may initiate a formal mediation process to facilitate resolution of the issue.

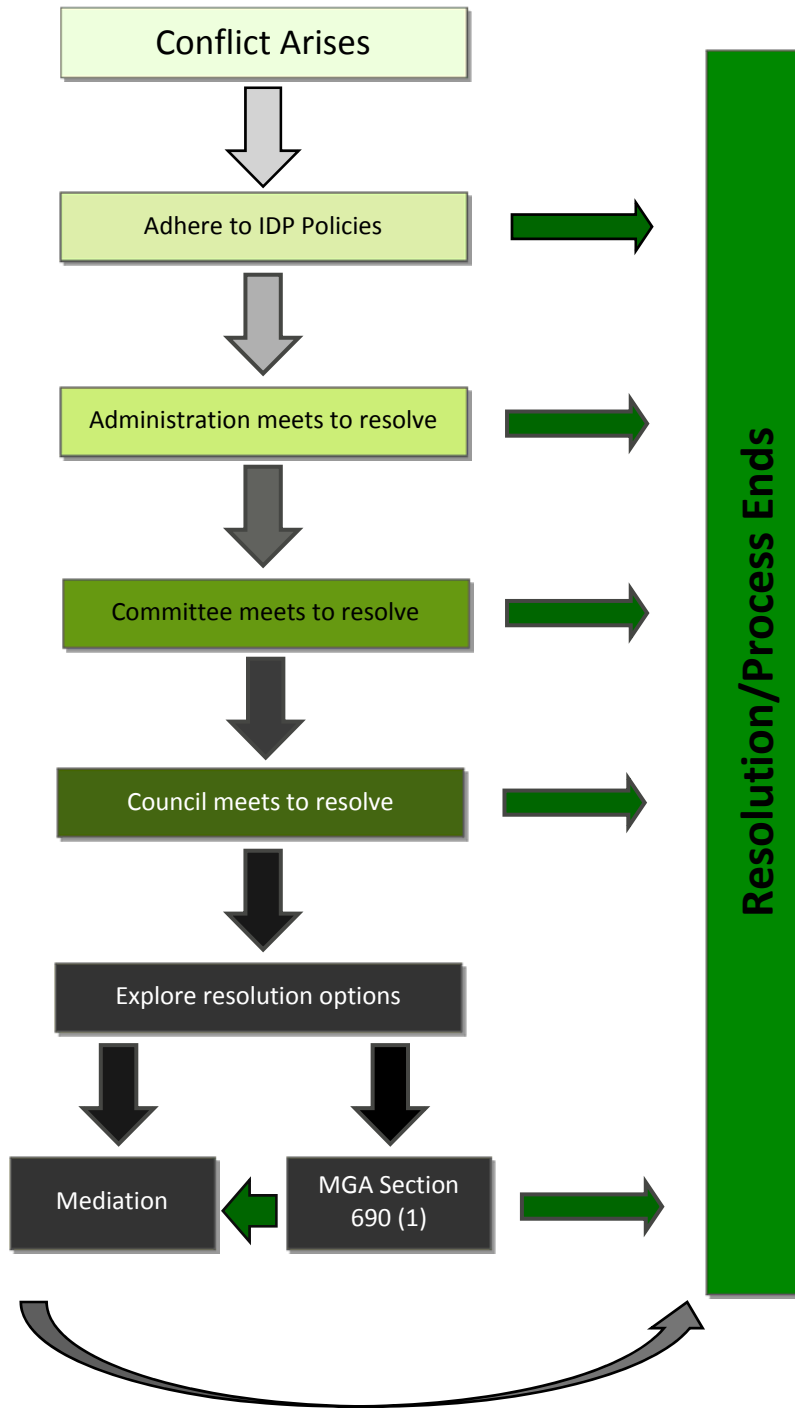

Filing an Intermunicipal Dispute under the Municipal Government Act

- 5.1.8 In the case of a dispute involving the adoption of a statutory plan, Land Use Bylaw or amendment to such, within 30 days of adoption, the municipality initiating the dispute may, without prejudice, file an appeal to the Municipal Government Board under section 690(1) of the *MGA* so that the provincial statutory right and timeframe to file an appeal is not lost.
- 5.1.9 The appeal may then be withdrawn, without prejudice, if a solution or agreement is reached between the two municipalities prior to the Municipal Government Board meeting. This is to acknowledge and respect that the time required to seek resolution or mediation may not be able to occur within the 30 day appeal filing process as outlined in the *MGA*.

Note: *Using section 690(1) of the MGA is the final stage of dispute settlement, where the municipalities request the Municipal Government Board to intercede and resolve the issue.*

Dispute Resolution Flow Chart

The dispute resolution flow chart presented here is for demonstration purposes only and shall not limit the ability of either municipality to explore other methods of resolution or to choose one method in place of another.
