- 19.4 A land use not listed as a permitted or discretionary use or not deemed a similar use in a district is a prohibited use and shall be refused.

SECTION 20 DEVELOPMENT IN MUNICIPALITY GENERALLY

- 20.1 A person who develops land or a building in the municipality shall comply with the standards of development specified in Schedules 4 and 5 in addition to complying with the use or uses prescribed in Schedule 2 and any conditions attached to a development permit, if one is required.
- 20.2 A person who develops land or a building in the municipality is also responsible for ascertaining, obtaining, and complying with the requirements of any federal, provincial or other municipal legislation.

SECTION 21 GENERAL SUBDIVISION PROVISIONS

- 21.1 All applications for subdivision approval shall be evaluated by the Village in accordance with the following criteria:

 - (g) any other matters the Village may consider necessary.
- 21.2 For the purpose of infill development, an application which proposes to subdivide an accessory structure onto a separate lot may be considered by the Subdivision Authority where:
- (a) the proposed lots meet the provisions of Schedule 2;
 - (b) the existing and proposed buildings meet the provisions of Schedule 2 based on the lot proposed layout;
 - (c) the access of each lot is provided from a public roadway, not a lane or laneway;
 - (d) all lots are serviceable to the satisfaction of the municipality.

- 21.3 At the time of subdivision and as a condition of approval, 10% of the lands to be subdivided shall be dedicated as municipal or school reserve in accordance with the provisions of the *MGA*. The Village may take municipal or school reserve in one or a combination of the following methods:

 - (b) land similar in quality to the land being proposed to be subdivided;
 - (c) money in lieu; or
 - (d) deferral to the balance of the subject property.
- 21.4 In commercial or industrial areas, the Village may allocate municipal reserve for the purpose of providing a buffer between incompatible land uses or to augment the parks and trails system.

SECTION 22 SUBDIVISION LOT DESIGN

22.1 Through lots or double frontage lots, shall be avoided except where essential to separate residential development from traffic arteries or to overcome specific disadvantages of topography and orientation. In such cases, access will be allowed only on the lower classification street.

- 22.2 Flag lots are prohibited.
- 22.3 All rectangular lots and, so far as practical, all other lots shall have side lot lines at right angles to straight street lines or radial side lot lines to curved street lines. Unusual or odd-shaped lots having boundary lines that intersect at extreme angles shall be avoided.
- 22.4 The lot line common to the street right-of-way line shall be the front line. All lots shall face the front line and a similar lot across the street. Wherever feasible, lots shall be arranged so that the rear line does not abut the side line of an adjacent lot.
- 22.5 No lot or parcel shall be created which does not provide for a buildable area as defined by the applicable land use district, except pursuant to an area structure plan.
- 22.6 When reviewing proposed lot and block arrangements, the Subdivision Authority shall consider the following factors:
- (a) Adequate Building Sites Required: Provisions of adequate building sites suitable to the special needs of the type of land use (residential, commercial or other) proposed for development shall be provided, taking into consideration topographical and drainage features.
 - (b) Minimum Lot Sizes Established: Minimum land use district and lot requirements defining lot sizes and dimensions shall be accommodated without creating unusable lot remnants.
 - (c) Safe Access Required: Block layout shall enable development to meet all Village engineering requirements for convenient access, circulation, control and safety of street traffic.
- 22.7 At the time of subdivision, all corner lots and interior laneway corner lots shall dedicate clear vision triangles as right-of-way.

SECTION 23 SUITABILITY OF SITES

- 23.1 Notwithstanding that a use of land may be permitted or discretionary or considered similar in nature to a permitted or discretionary use in a land use district, the Development Authority, as applicable, may refuse to approve a subdivision or issue a development permit if the Development Authority is made aware of, or if in their opinion, the proposed building or use is not safe or suitable if the site:
- (a) does not have safe legal and physical access to a maintained road in accordance with the Land Use Bylaw, other municipal requirements, or those of Alberta Transportation if within 300 m (984 ft) of a provincial highway or 800 m (2,625 ft) from the centre point of an intersection of a controlled highway and a public road;
 - (b) has a high water table, drainage issues or soil conditions which make the site unsuitable for foundations in accordance with provincial regulations;
 - (c) is situated on an unstable slope;
 - (d) consists of unconsolidated material unsuitable for building;
 - (e) does not comply with the requirements of the South Saskatchewan Regional Plan, Subdivision and Development Regulation or any other applicable Statutory Plans;
 - (f) is situated over an active or abandoned coal mine or oil or gas well or pipeline;
 - (g) is unsafe due to contamination by previous land uses;
 - (h) does not meet the minimum setback requirements from a sour gas well or bulk ammonia storage facility;
 - (i) does not have adequate water and sewer provisions;
 - (j) does not meet the lot size and/or setback requirements or any other applicable standards or requirements of the Village of Barnwell Land Use Bylaw;
 - (k) is subject to any easement, caveat, restrictive covenant or other registered encumbrance which makes it impossible to build on the site.
- 23.2 Nothing in this section shall prevent the Designated Officer or Municipal Planning Commission, as applicable, from issuing a development permit or approving a subdivision if the Designated Officer or Municipal Planning Commission is satisfied that there is no risk to persons or property or that these concerns will be met by appropriate engineering measures or other mitigating measures and approvals from provincial and/or federal agencies have been obtained, as applicable.

Contaminated Lands and Brownfield Development

- 23.3 Any application for either subdivision or development that is proposed on lands or in an area known or deemed to potentially contain contaminated lands, or is the site of former chemical, pesticide, heavy industrial, railway associated, oil and gas processing or storage, gas station, automotive related uses or other similar type uses, may be subjected to special information requirements and conditions, including but not limited to, professional engineering and geotechnical studies, environmental assessments, water reports and soils analysis being submitted to the municipality in addition to the other bylaw requirements.
- 23.4 Notwithstanding that a use of land may be permitted or discretionary in a land use district, the Municipal Planning Commission may:

- (a) refuse to issue a development permit or approve a subdivision, if the relevant Authority is of the opinion that the site of the proposed development or use is not safe or poses a potential health or liability risk, based on the information provided; or
- (b) if approving a development permit or subdivision, place conditions on the approval to mitigate or address potential or identified hazards, health risks, contamination or site specific land concerns, including but not limited to:
 - (i) providing professional remediation, reclamation or clean-up of the parcel or site at the applicant or land owner's expense;
 - (ii) limiting or restricting development on the parcel or applying special setbacks to address the location of improvements on site;
 - (iii) providing professional engineering or geotechnical reports bearing the seal of a licensed engineer to support or verify any aspects of the proposal or condition of the land;
 - (iv) having the land owner or applicant post bonds or other security as it relates to the estimated costs of the reclamation or clean-up of the parcel;
 - (v) signing a legal agreement to indemnify and save harmless the municipality from all potential actions, suits, damages, or claims as it relates to the development of the land and any development permit being issued or subdivision approval;
 - (vi) any other reasonable conditions to ensure the development or subdivision may be approved as safe as reasonably possible and is suitable for the land.

SECTION 24 NUMBER OF DWELLING UNITS ON A PARCEL

- 24.1 No more than one dwelling unit shall be constructed or located or caused to be constructed or located on a parcel except as provided for in the land use district for which the application is made (e.g. accessory dwelling, two-unit dwellings, multi-unit dwellings, secondary suite) as permitted in the applicable land use district.

SECTION 25 NON-CONFORMING BUILDINGS AND USES

- 25.1 If a development permit has been issued on or before the day on which this bylaw or a land use amendment bylaw comes into force in a municipality and the bylaw would make the development in respect of which the permit was issued a non-conforming use or non-conforming building, the development permit continues in effect in spite of the coming into force of the bylaw.
- 25.2 A non-conforming use of land or a building may be continued but if that use is discontinued for a period of six consecutive months or more, any future use of the land or building must conform with the Land Use Bylaw then in effect.
- 25.3 A non-conforming use of part of a building may be extended throughout the building but the building, whether or not it is a non-conforming building, may not be enlarged or added to and no structural alterations shall be made to it or in it.
- 25.4 A non-conforming use of part of a lot may not be extended or transferred in whole or in part to any other part of the lot and no additional buildings may be constructed on the lot while the non-conforming use continues.
- 25.5 A non-conforming building may continue to be used, but the building may not be enlarged, added to, rebuilt or structurally altered except:
- (a) to make it a conforming building; or

- (b) as the Designated Officer considers necessary for the routine maintenance of the building, in accordance with the variance powers provided for in section 643(5)(c) of the *MGA*. Routine maintenance of the building may include the replacement of windows and doors, or adding attached uncovered steps.
- 25.6 If a non-conforming building is damaged or destroyed by more than 75 percent of the value of the building above its foundation, the building may not be repaired or rebuilt except in accordance with this bylaw.
- 25.7 Questions regarding the interpretation and application of Sections 25.3 and 25.6 shall, if necessary, be referred to the Municipal Planning Commission for interpretation and a decision.
- 25.8 The land use or the use of a building is not affected by a change of ownership or tenancy of the land or building.

SECTION 26 NON-CONFORMING VARIANCES

Schedule 5

USE SPECIFIC STANDARDS OF DEVELOPMENT

USE SPECIFIC STANDARDS OF DEVELOPMENT

The standards in this schedule establish additional requirements for specific uses or structures. The General Standards of Development in Schedule 4 and the requirements of the applicable land use district also apply unless otherwise stated.

SECTION 1 ALTERNATIVE ENERGY SOURCES: SOLAR AND WIND

- 1.1 The Development Authority is authorized to issue development approvals for alternative energy sources such as, but not limited to, solar panels, heat exchange systems, generators, turbines, etc. provided that any additional approvals or standards required at the municipal, provincial and/or federal levels are met or exceeded.

SOLAR COLLECTOR

- 1.2 A solar collector attached to a wall or roof of a building may be permitted in any land use district as an accessory structure subject to the following:
- (a) A solar collector mounted on a roof:
 - (i) may project a maximum of 1.3 m (4 ft) from the surface of the roof and shall not exceed the maximum height requirements of the applicable land use district; and
 - (ii) must not extend beyond the outermost edge of the roof.
 - (b) A solar collector mounted to a wall:
 - (i) must be located such that it does not create undue glare on neighbouring property or public roadways;
 - (ii) must be located a minimum of 2.3 m (7.5 ft) above grade;
 - (iii) may project a maximum of 1.5 m (5 ft) from the surface of the wall, when the wall faces the rear property line, subject to the setback requirements of the applicable land use district; and
 - (iv) may project a maximum of 0.6 m (2 ft) from the surface of the wall when the wall faces the front, secondary front or side property line, subject to the setback requirements of the applicable land use district.
- 1.3 A free-standing solar collector or a solar collector mounted to any structure other than a roof or wall of a building shall be classified as an accessory use and processed subject to the applicable land use district and the following additional standards:
- (a) must be located such that it does not create undue glare on neighbouring property or public roadways; and
 - (b) must not exceed 1.8 m (6 ft) in height above existing grade.

SMALL WIND ENERGY SYSTEMS

Definitions

- 1.4 The following definitions apply to this schedule:
- (a) **Blade** means an element of a wind energy system rotor, which acts as a single airfoil, thereby extracting kinetic energy directly from the wind.
 - (b) **Blade clearance** means, in reference to a horizontal axis rotor, the distance from grade to the bottom of the rotor's arc.
 - (c) **Rotor's arc** means the largest circumferential path travelled by a blade.
 - (d) **Small Wind Energy System (SWES)** means a wind energy conversion system consisting of a wind turbine (rotor and blades), a tower, and associated control or conversion electronics, which has a rated capacity that does not exceed the allowable rated capacity of 3 kW and which will be used primarily to reduce onsite consumption of utility power and is CSA approved.
 - (e) **Total height** means the height from grade to the highest vertical extension of a SWES. In the case of a SWES with a horizontal axis rotor, total height includes the distance from grade to the top of the tower, plus the distance from the top of the tower to the highest point of the rotor's arc.
 - (f) **Tower** means the structure which supports the rotor above grade.

Permit Requirements

- 1.5 Small Wind Energy Systems shall require a development permit depending on their location, as provided in the regulations for the land use districts in which they are allowed.
- (a) **Type A Small Wind Energy System:** This use is defined as a Small Wind Energy System that is either roof mounted or has a tower which does not exceed 12.2 m (40 ft) in height.
 - (b) **Type B Small Wind Energy System:** This use is defined as a Small Wind Energy System that has a tower which is greater than 12.2 m (40 ft) in height but does not exceed 24.4 m (80 ft) in height.

Information Requirements

- 1.6 Applications for Small Wind Energy Systems shall include the following information where applicable:
- (a) all proposed Small Wind Energy Systems shall be commercially manufactured and applications shall include the manufacturers make and model number;
 - (b) the manufacturer's specifications indicating:
 - the SWES rated output in kilowatts;
 - safety features and sound characteristics;
 - type of material used in tower, blade, and/or rotor construction;
 - (c) potential for electromagnetic interference;
 - (d) nature and function of over speed controls which are provided;
 - (e) specifications on the foundations and/or anchor design, including location and anchoring of any guide wires;
 - (f) information demonstrating that the system will be used primarily to reduce on-site consumption of electricity; and

- (g) location of existing buildings or improvements.

Referrals

- 1.7 Prior to making a decision on a development application for a Small Wind Energy System, the Municipal Planning Commission may refer and consider the input of the following agencies and departments:
 - (a) Alberta Utilities Board,
 - (b) Transport Canada,
 - (c) NavCanada,
 - (d) any other federal or provincial agencies or departments deemed necessary.

Setbacks

- 1.8 A Small Wind Energy System shall comply with all the setbacks that govern the principal use in the district in which it is located.
- 1.9 No part of the wind system structure, including guy wire anchors, may extend closer than 3.0 m (10 ft) to the property boundaries of the installation site.

Development Standards

- 1.10 There shall be a limit of one Small Wind Energy System per parcel.
- 1.11 The system's tower shall be set back a minimum distance equal to the height of the tower from all parcel lines, and a minimum distance of 3.0 m (10 ft) from any other structure on the parcel on which the system is located. On parcels 4.0 ha (10 acres) or more, the parcel line setback may be reduced if the applicant demonstrates that:
 - (a) because of topography, strict adherence to the setback requirement would result in greater visibility of the system's tower than a reduced setback; and
 - (b) the system's tower is set back a minimum distance equal to the height of the tower from any structure on adjoining parcels.
- 1.12 The system's tower shall not exceed a maximum height of 12.2 m (40 ft) on a parcel of less than 0.4 ha (1 acre), a maximum of 19.8 m (65 ft) on a parcel of 0.4 ha (1 acre) to less than 2.0 ha (5 acres), and maximum height of 24.4 m (80 ft) on a parcel 2.0 ha (5 acres) or more.
- 1.13 The system's tower shall be located and screened by landforms, natural vegetation or other means to minimize visual impacts on neighbouring residences and public roads, public trails and other public areas.
- 1.14 The system's tower and supporting structures shall be painted a single, neutral, non-reflective, non-glossy (for example, earth-tones, grey, black) that, to the extent possible, visually blends the system with the surrounding natural and built environments.
- 1.15 The system shall be equipped with manual and automatic over speed controls. The conformance of rotor and over speed control design and fabrication to good engineering practices shall be certified by a licensed mechanical, structural or civil engineer.
- 1.16 The system's tower-climbing apparatus and blade tips shall be no closer than 4.6 m (15 ft) from ground level unless the system is enclosed by a 1.8-metre (6-ft) high fence.

- 1.17 The system's utility lines shall be underground where economically practical.
- 1.18 The system shall be operated such that no electro-magnetic interference is caused.
- 1.19 The system's maximum power shall not exceed 3 kW.
- 1.20 The system shall be located in the rear or side yard.
- 1.21 Small wind turbines shall not exceed 60 dB(A), or in excess of 5 dB(A) above the background noise at the property line, whichever is greater. The level, however, may be exceeded during short-term events including utility outages and severe windstorms.
- 1.22 Brand names or advertising associated with the system or the system's installation shall not be visible from any public place.
- 1.23 Upon abandonment or termination of the system's use, the entire facility, including the system's tower, turbine, supporting structures and all equipment, shall be removed and the site shall be restored to its pre-construction condition.

Review of Permits

- 1.24 Village Council shall review the impacts of issuance of permits for Small Wind Energy Systems after the issuance of 25 development permits for this specific use within the municipality.

TELECOMMUNICATION ANTENNA SITING PROTOCOL

The intent of this schedule is to guide the telecommunications industry and amateur radio operators through the process of tower siting within the municipality. This guide was developed in accordance with Industry Canada siting protocols.

SECTION 1 MUNICIPAL APPROVAL

- 1.1 Proposals for freestanding telecommunication antennas shall not be required to obtain a development permit but shall be required to make a submission to the Municipal Planning Commission including:
 - (a) the information as listed in section 2; and
 - (b) complete the notification and public consultation process found in Section 3.
- 1.2 Concurrence with the proponent's project will be measured against the requirements of each district's requirements and criteria listed below. If all requirements are met, the Village of Barnwell will provide concurrence in the form of a written letter to the proponent.
- 1.3 The following are excluded from submitting information for review:
 - (a) an antenna mounted on a building that projects less than 2 m (6.6 ft) in height above the top of the building;
 - (b) commercial or Business Industrial designated lands which are a minimum of 150 m (492 ft) from residential designated lands or lands designated for public purpose.

SECTION 2 INFORMATION REQUIREMENTS

Co-utilization (Co-location)

- 2.1 All proponents for freestanding antenna structures will be requested to identify any other such structures within a radius of 500 metres of the proposed location and to provide documentary evidence that co-utilization of the existing or new structure is not a viable alternative to a second structure.

Appearance

- 2.2 All proponents for antenna structures which are visible from residential areas may be requested to employ innovative design measures to mitigate the visual impact of these structures. The proponent shall provide stealth structure options when requested by the municipality. Stealth structure options will be based on an evaluation of the massing, form, colour, material, and other decorative elements, that will blend the appearance of the facility into and with the surrounding lands.

- 2.3 Lighting in addition to that which is required by applicable federal agencies shall be avoided. Security lighting may be considered provided it meets the requirements of the applicable land use district.
- 2.4 Only signage that is required by applicable federal agencies is permitted. No advertising signage shall be permitted.

SECTION 3 NOTIFICATION AND PUBLIC CONSULTATION PROCESS

- 3.1 At the expense of the applicant, the municipality will notify all land owners within a distance of 500 m (1640 ft) of the proposed structure.
- 3.2 With each notification, the proponent will be responsible to submit a letter providing notification of the location of the tower, physical details of the tower, the time and location of the public meeting, and a contact name and phone number of someone employed by the proponent who can answer questions regarding the proposal. The notifications should be sent 25 days prior to the public meeting.
- 3.3 The proponent shall be prepared to hold an open house regarding their development proposal and should proactively explain all aspects of the siting, technology and appearance of the proposed structure.
- 3.4 From the public meeting, the proponent will be responsible to provide the Municipal Planning Commission with a copy of the agenda and the minutes indicating the topics discussed, additional concerns raised with resolutions, and any outstanding issues that the proponent and/or landowners could not resolve.
- 3.5 Where the public process has raised unresolved concerns about public health and related effects of wireless communication technology, the Village of Barnwell will request a ruling by Industry Canada prior to the issuance of a letter of concurrence.

"VOLUNTARY WAIVER OF CLAIMS" (OPTIONAL)

For Development Approvals of Discretionary Uses and/or Approvals Granting a Waiver of Development Standards

This "Voluntary Waiver of Claims" allows you to commence your development at your own risk in advance of the date of validity on your Development Permit. The permit's valid date is the date at which the appeal period for the public has expired.

By agreeing to this "Voluntary Waiver of Claims" you agree that should an appeal be made you will immediately cease the development pending the outcome of the appeal and will waive all claims to compensation from the Village of Barnwell for costs associated with the cessation and/or costs resulting from the outcome of the appeal, including the removal of improvements and restoration of disturbances to the land/buildings to their former state.

Agreement to this "Voluntary Waiver of Claims" does not nullify your own right to an appeal. You may appeal any condition of approval on the Development Permit to the Subdivision and Development Appeal Board by the date identified on your permit.

Agreement to this "Voluntary Waiver of Claims" and possession of the released Development Permit does not eliminate the need for a Business License, Building Permit or other permits. Do not commence development without first obtaining all the necessary permits.

I have read, understood, and agree to this "Voluntary Waiver of Claims".
